

# Structures Are Made from Materials

A structure is the support frame of an object.  
Structures are made from different materials.  
A frame structure is like a skeleton.

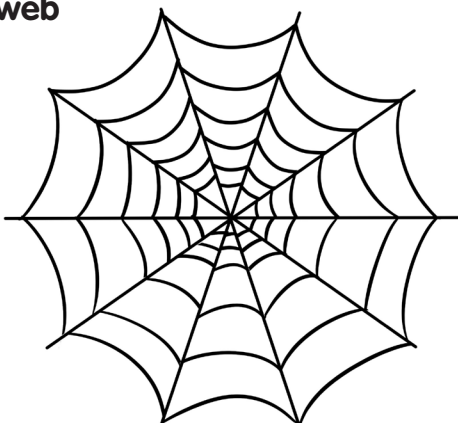

The tent is made from fabric called nylon.  
The poles are metal.  
The poles support the tent.  
The poles are a structure.

## Think About It!

1. Circle the structure below that was made by people.  
Draw a box around the structure found in nature.
