

Think About It: Dish Soap and Salt Slime

1. What did you notice when you started to mix the salt water with the dish soap?

2. Touch the slime mixture before you cover it. Describe what it feels like. Be sure to wash your hands after.

3. What did the slime mixture feel like after 2 or 3 days of resting?

4. Which of the ingredients do you think made the dish soap turn to gel? Circle the answer.

A. water

B. salt

C. food colouring

5. Do you think this experiment would work without the salt? Why or why not?
